

What some of Energia's electricity & gas customers say:

When considering our options in choosing an energy supplier, Energia had the required experience which enabled our sites to be more energy efficient and ultimately more cost competitive. We have already made significant savings in energy costs in areas such as refrigeration, air conditioning, compressed air, motive power and lighting. Energia was able to provide a power solution specifically tailored to our needs.

Musgrave SuperValu-Centra

We're rapidly upgrading and expanding our services to maximise efficiencies and enhance passenger transport. By choosing Energia, a further competitive element has been introduced which ensures that Iarnród Éireann and DART will operate with the maximum achievable energy savings going forward.

Iarnród Éireann

As a local authority we are committed to promoting sustainable development. By choosing green power we are participating in the sustainable energy market and contributing to the removal of greenhouse gas emissions from the atmosphere. We chose Energia because they are a well established company already supplying a number of other large authorities.
